

Tuesday 22nd February 2022, 4.15 pm – 5.15 pm

Presence and Fate Nanoplastics in the Environment: Analytical and Experimental Challenge

Adjunct Prof. Dr. Julien Gigault

Université Laval (ULaval), Chemistry
Department, Quebec

BIO. Dr. Julien Gigault is adjunct professor at the ULaval and scientific researcher at the University of Rennes, Geoscience department. His research focuses on the toxicity and environmental impact of micro- and nanoplastics, especially in aquatic environments.

You are welcome to attend virtually in the [Zoom seminar room](#) (Meeting ID: 661 2561 8101, psw: 123456).

The presentation will be followed by a talk by Alexandra Foetisch, doctoral candidate from the Soil Science Group, on the topic:

“Investigation of Plastic Aging in Soil using Scanning Transmission X-ray Microscopy (STXM).”
