

# Colloquium in Remote Sensing

## Spring Semester 2021

Tuesday, 16:15 – 17:00

Zoom: you can request the meeting-id and password via the mailing list or per e-mail

- |        |                                                                                                                                                                   |
|--------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Feb 16 | <b>Kathrin Naegeli</b><br>Cryosphere: science (HKH) and teaching (Girls on Ice)                                                                                   |
| Feb 23 | <b>Stefan Wunderle</b><br>Activities and plans for 2021                                                                                                           |
| Mar 2  | <b>Francesca Piatto (European Association of Remote Sensing Companies)</b><br>e-shape: Earth Observation for decision-makers, citizens, industry, and researchers |
| Mar 9  | <b>Julian Bernegger</b><br>Land Surface Temperature in Kenya                                                                                                      |
| Mar 16 | <b>Lena Hellmann</b><br>Girls on Ice                                                                                                                              |
| Mar 23 | <b>Nils Rietze (14:15, different Zoom Link, contact Nils Rietze)</b><br>Seasonal Glacier Mass Balance Estimation Using AVHRR Optical Imagery                      |
| Mar 30 | <b>Jara Badawi</b><br>Historical Snow Maps                                                                                                                        |
| Apr 13 | <b>Open Session</b>                                                                                                                                               |
| Apr 20 | <b>Kathrin Naegeli</b><br>Global snow products – V2                                                                                                               |
| Apr 27 | <b>Helga Weber</b><br>GCOS Fractional Snow Cover                                                                                                                  |
| May 4  | <b>Hannah Augustin</b><br>SemantiX – data cube: update and first results                                                                                          |
| May 11 | <b>Noël Appenzeller</b><br>Snow on Ground                                                                                                                         |
| May 18 | <b>Céline Portenier</b><br>Snow Monitoring Using Webcam Images                                                                                                    |
