Erlachstrasse 9a T3
Seminar Room 1st floor

East African climate and environmental dynamics at multiple time scales: insight from lake sediments

Prof. Dr. Dirk Verschuren

Department of Biology, Ghent University, Belgium

Dirk is a Full Professor and leads the Limnology Unit at the Department of Biology, Gent University. His research focuses on freshwater ecosystems of tropical and temperate regions. He is a leading expert on the long-term dynamics of African aquatic and terrestrial ecosystems under the combined influence of natural climate variability and human impact.
